Joseph Lusk (census taker), note at end of agricultural return:

The character of the the land in above District is good, it being composed of loam with limestone
 bottom siz... in 1, 2, 3, to 4th Con principally whole part of 3, 4, & 5th is composed of clay mixed with
 loam. This district is of small extent owing to the peculiar form of this township and as will be
 perceived the number of lots in each Concession is necessarily small the 1st Range containing but one
 lot and several of the lots in the 5th Range being situate upon the mountains which form the northern
 boundary of the township they are unseizable & consequently unoccupied. The total number of lots
 in the District occupied does not exceed 14 which is in fact with one or two exceptions the full
 number contained in the said Ranges.
